

## GRASSES, SEDGES and REEDS

Here is just one example of each; a great variety of grasses were growing all around the farm, and various other sedges and reeds in the wildlife pond.

### PENDULOUS SEDGE

*Carex pendula*

In Wildlife Garden near pond; first photo shows it flowering early May; the second photo shows it fruiting in June. The male flower is the top one only, the others are female.

### PERENNIAL RYE-GRASS

*Lolium perenne*

Flowering in June.

### BRANCHED BUR-REED

*Sparganium erectum*

An aquatic plant, growing in the Wildlife Pond and seen flowering late June.
